Cabin Creek Timber Frames  
"A Work of Art".....Free

**Cabin Creek Timber Frames has been building timber frames of quality and beauty for over 21 years. We are located in the beautiful mountains of Western North Carolina.**

**While we do offer, standard" timber frame designs, the majority of our work has been custom; hand crafted by professional timer frame artisans to our exacting specifications. We understand that our clients are highly individualistic, knowledgeable about what they want, and value quality and fine craftsmanship.**

**We will work with your architect or designer or your plan to help you create the dream dwelling of your choice. The house plan we have submitted for you in this issue of Timber Home Living was one brought to us by James A. Smith and his wife Ruth McKinley. Jim had fine tuned it until he had just what they wanted. They have been gracious enough to let us share it with you here today. Our in-house timber frame designer then turned Jim's floor plan into a unbelievable work of art sculpted of cypress.**

**Our in-house timber frame design staff employs the latest in CAD Works software technology. We invite you to tour our website, it has a wealth of information regardless whether you are just beginning the planning your timber frame or looking for the right company to handcraft it. If you like what you see there or in our literature we invite you to visit with us. Our timber frame office and beamery are all located on the same property. We would like to meet with you; then take you on a tour of our beamery - meet with our craftsmen, see where most of the magic happens.**

**We would like to talk with you about your project regardless of its size. Over the years we have crafted projects as small as decorative pendants for a great room, mantles, signs, entry ways, porches, trusses, gazebos, wonderful horse barns, outdoor kitchens, great rooms, hybrid timber frame homes, full timber fame homes, wineries, the central core of our own counties public library, and many more. What is your dream?**

**The most frequently requested wood species used in crafting our timber frames include cypress, eastern white pine, and Douglas fir. We take great pride in being "on budget and on time."**

**Once again we invite you to take the time to view the extensive material on our websites [www.cabincreektimberframes.com](http://www.cabincreektimberframes.com) and then make an appointment to tour our beamery and visit our model home.**

**Best wishes on your timber frame project,  
Joe and Jo Bell**
